Homework 2

The problem numbers are from the 8th edition of the textbook. If you have the international version of 8th edition, do the problem with the number in brackets. If there is no number in brackets following the "standard" number, this means they are the same.

4.1, 4.9 (4.10), 4.21, 4.22, 4.40, 5.1 (5.2), 5.3 (5.4), 5.10 (5.9), 5.12 (5.11), 5.41.

Note: I didn't verify problem 4.22. If you have the international edition make sure that 4.22 is about reaction time of a chemical process. If it's not find the one like that. It might be 4.23.
